☐

Please see the enclosed documents for a detailed response to parts a), b), c), d) and e) (i), (ii), (iii), (iv) from Innovation, Science and Economic Development Canada (ISED).

Parts e) (v), f), g) and h) ISED does not systematically track the information requested.

Part h) 87.4 % (Communications Monitoring Report 2020) of Canadians have access to high speed internet service.

The Universal Broadband Fund

The \$2.75 billion Universal Broadband Fund (UBF) launched in November 2020, and will help ensure that 98% of Canadians are connected to high-speed Internet by 2026, and 100% by 2030. The UBF includes a Rapid Response Stream (RRS), which funds shovel-ready projects that will have an immediate impact, and advance the overall aims of the UBF. The UBF has announced 131 Rapid Response projects, which will provide \$111 million to connect 75,000 households. These projects are rolling out across the country right now, and there are more RRS projects that we are preparing to announce.

Partnerships with provinces and territories

The government of Canada has also been working with the provinces and territories to advance our connectivity goals. Significant agreements with [Ontario](#) and [Quebec](#) (see [also](#)) and have already been signed, cost-sharing \$2.12 billion in total investments to connect 446,000 households. An [agreement with Alberta](#) was announced in December 2021, and the co-selection the projects that will be a part of this agreement is currently underway. The Government of Canada [has also partnered with the Government of British Columbia](#) to support continuous cell coverage along B.C.'s Highway 16, commonly called as the Highway of Tears. This shared \$4.5 investment is part of a \$50 million funding stream for mobile Internet projects that primarily benefit Indigenous peoples, including projects along highways and roads where mobile connectivity is lacking.

Project assessment

ISED is in the process of assessing 1900 applications that were successfully submitted to the UBF. It is working with all provinces and territories to ensure that projects are announced across the country in the coming months.

Commitment to transparency

The Government of Canada is committed to open and transparent government, and publishes the details of projects that have been publicly announced under the Rapid Response Stream on the UBF Selected Projects page: <https://www.ic.gc.ca/eic/site/139.nsf/eng/00021.html>. Quarterly project status updates for projects awarded funding under the UBF will be available online, similar to what is currently done for the Connect to Innovate program: <https://www.ic.gc.ca/eic/site/119.nsf/eng/00017.html>

Note about data

The data included in this table is accurate as of December 20, 2021 and includes all streams of the Universal Broadband Fund (UBF) - Rapid Response, mobile Internet projects that benefits Indigenous Peoples, large/high-impact and all other broadband projects. Links to news releases for the Highway of Tears in British Columbia and in Operation Canada Quebec Haute Vitesse are included in the table.

Q-226

Q-226² — December 14, 2021 — Mr. Masse (Windsor West) — With regard to the Universal Broadband Fund and the government's commitment to provide high-speed Internet services to 98% of Canadians by 2026 and 100% by 2030, broken down by province and territory: (a) how many applications for funding were received; (b) of those applications in (a), how many were approved; (c) what is the total amount distributed by the fund since its official launch; (d) how many applications were classified as coming from a local government district; (e) what are the details of all funds awarded, including the (i) recipient, (ii) amount, (iii) location, (iv) project description or summary; (f) of the details in e), how many jobs were created, broken down by (i) federal riding, (ii) municipality, (iii) census agglomeration, (iv) census metropolitan area, (v) economic region; g) of the jobs in (f) how many are directly related to (i) the Universal Broadband Fund, (ii) provincial government initiatives, (iii) municipal initiatives; and (h) what is the percentage of Canadians with access to high speed internet service to date?

Note: Data is accurate as of December 14, 2021 and includes all streams of the Universal Broadband Fund (UBF) - Rapid Response, mobile Internet that benefits Indigenous Peoples, Large/high-impact and all other broadband projects. Projects that have been publicly announced under the Rapid Response Stream can be found on the UBF Selected Projects page: <https://www.ic.gc.ca/eic/site/139.nsf/eng/00021.html>. Vous trouverez ci-joint les réponses détaillées pour les parties (a), (b), (c), (d) et (e) (i), (ii), (iii), (iv) d'Innovation, Sciences et Développement économique Canada (ISDE).

Parties (e) (v), (f), (g) et (h) l'ISDE ne suit pas systématiquement les informations demandées.

Partie (h) 87.4% (Rapport de surveillance des communications, 2020) des Canadiens ont accès à un service Internet haute vitesse.

Le fonds pour la large bande universelle

Le Fonds universel pour la large bande (FLBU) de 2,75 milliards de dollars a été lancé en novembre 2020 et contribuera à faire en sorte que 98 % des Canadiens soient connectés à Internet haute vitesse d'ici 2026 et 100 % d'ici 2030. Le FLBU comprend un flux de réponse rapide (RRS), qui finance des projets prêts à l'emploi qui auront un impact immédiat et feront progresser les objectifs généraux du FLBU. Le FLBU a annoncé 131 projets de réponse rapide, qui fourniront 111 millions de dollars pour connecter 75 000 foyers. Ces projets sont en cours de déploiement à travers le pays en ce moment, et il y a d'autres projets RRS que nous nous préparons à annoncer.

Partenariats avec les provinces et les territoires

Le gouvernement du Canada travaille également avec les provinces et les territoires pour faire progresser nos objectifs de connectivité. Des accords importants avec [Ontario](#) et [Québec](#) (voir [aussi](#)) et ont déjà été signés, partageant les coûts d'investissements totaux de 2,12 milliards de dollars pour connecter 446 000 foyers. Une [entente avec l'Alberta](#) a été annoncé en décembre 2021, et la co-sélection des projets qui feront partie de cet accord est actuellement en cours. Le Gouvernement du Canada [a aussi une entente avec le Gouvernement de l'Alberta](#) soutenir une couverture cellulaire

continue le long de la route 16 de la Colombie-Britannique, communément appelée la route des larmes. Cet investissement partagé de 4,5 \$ fait partie d'un flux de financement de 50 millions de dollars pour des projets d'Internet mobile qui profitent principalement aux peuples autochtones, y compris des projets le long des autoroutes et des routes où la connectivité mobile fait défaut.

Évaluation du projet

ISDE est en train d'évaluer 1900 candidatures qui ont été soumises avec succès du FLBU. Il travaille avec toutes les provinces et tous les territoires pour veiller à ce que des projets soient annoncés dans tout le pays au cours des prochains mois.

Engagement de transparence

Le gouvernement du Canada s'engage à offrir un gouvernement ouvert et transparent et publie les détails des projets qui ont été annoncés publiquement dans le cadre du volet d'intervention rapide sur la page des projets sélectionnés du FLBU.: <https://www.ic.gc.ca/eic/site/139.nsf/fra/00021.html>. Des mises à jour trimestrielles de l'état des projets pour les projets bénéficiant d'un financement dans le cadre de l'UBF seront disponibles en ligne, de la même manière que ce qui est actuellement fait pour le programme Brancher pour Innover : <https://www.ic.gc.ca/eic/site/119.nsf/fra/00017.html>.

Notes concernant les données

Les données incluses dans ce tableau sont exactes au 20 décembre 2021 et incluent tous les volets du Fonds universel pour le haut débit (FLBU) - Réponse rapide, les projets d'Internet mobile qui profitent aux peuples autochtones, les projets à grande/forte incidence et tous les autres projets à large bande. Des liens vers les communiqués de presse pour l'Autoroute des larmes en Colombie-Britannique et dans Opération Canada Québec Haute Vitesse sont inclus dans le tableau.

Q-226

Q-226² — 14 décembre 2021 — Mr. Masse (Windsor West) — En ce qui concerne le Fonds pour la large bande et la promesse du gouvernement de faire en sorte que 98 % des Canadiens aient accès à un service Internet haute vitesse d’ici 2026 et 100 % des Canadiens, d’ici 2030, ventilé par province et par territoire : a) combien de demandes de financement a-t-on reçues; b) parmi les demandes mentionnées en a), combien ont été approuvées; c) quelle est la somme totale distribuée par le Fonds depuis son lancement officiel; d) combien de demandes proviennent d’une administration locale; e) quels sont les détails de toutes les sommes distribuées, y compris (i) le bénéficiaire, (ii) la somme, (iii) l’emplacement, (iv) la description ou le résumé du projet; (f) parmi les détails mentionnés en e), combien d’emplois ont été créés, ventilé par (i) circonscription fédérale, (ii) municipalité, (iii) agglomération de recensement, (iv) région métropolitaine de recensement, (v) région économique; g) parmi les emplois mentionnés en f), combien étaient directement liés (i) au Fonds pour la large bande, (ii) à des initiatives d’un gouvernement provincial, (iii) à des initiatives d’une administration municipale; h) quel pourcentage de Canadiens ont accès à un service Internet haute vitesse aujourd’hui?

Note : Les données sont exactes en date du 14 décembre 2021 et incluent tous les volets du Fonds universel pour la large bande (FLBU) - Volet Réponse rapide, l’accès à Internet profite aux peuples autochtones, les projets à large bande/à fort impact et tous les autres projets à large bande. Les projets qui ont été annoncés publiquement dans le cadre du volet de Réponse rapide peuvent être consultés sur la page Projets sélectionnés du FLBU : <https://www.ic.gc.ca/eic/site/139.nsf /fra/00021.html>. * Les montants totaux distribués pour la Colombie-Britannique et le Québec comprennent 2,25 millions de dollars pour la Route des larmes et 514 millions de dollars pour Opération Haute Vitesse.
